Make ————— Space ————— Work

Elan

A close-up photograph of the base of an office chair. The chair has a light-colored wood-grain top. The base is made of polished, reflective metal. It features a central vertical post that branches into two diagonal legs. Each leg is equipped with a black castor wheel. The chair is positioned on a light-colored, textured floor.

Elan

Elan is a highly versatile product that offers over 250 options with custom sizes, features and colours. Entirely designed and developed within our product development facility in Adelaide, Elan ticks all the boxes for functionality, durability and longevity, while being offered in a contemporary design package.

The Elan Flip table comes with a precision mechanism that eliminates all wobble and unsteadiness found commonly in flip tables. The single-handed flip action provides seamless and effortless operation with a solid, tactile click when it locks into open or closed position.

The large medical grade castors are fully lockable and come with a rubberised tread allowing the table to glide silently over hard or soft flooring. Additionally, the feet are ideally positioned to allow for optimal nesting and storage when the tables are not in use.

The Elan fixed tables can be configured to almost any desired size, and come with high-quality glides. The various table top options combined with the colour offerings and multiple configurations of the base truly positions Elan to fit into every commercial environment beautifully.
